

THE CATALOG OF THE FISH COLLECTION OF THE
WILDLIFE HERITAGE TRUST OF SRI LANKA (WHT)
NOW AT THE NATIONAL MUSEUM OF SRI
LANKA (NMSL)

Prepared by Hiranya Sudasinghe

Notes

Taxonomic changes over the past few years that need to be considered when referring to the database.

After the revision of the genus *Puntius* (family Cyprinidae) by Pethiyagoda *et al.* 2012, the genus *Puntius* was split in to five genera. As a result, species hitherto identified as *Puntius singhala*, *P. srilankensis*, *P. filamentosus*, *P. exclamation*, *P. assimilis*, *P. arulius* etc now belong to the genus ***Dawkinsia***.

The species hitherto identified as *Puntius cumingii*, *P. reval*, *P. nigrofasciata*, *P. bandula*, *P. melanomaculata*, *P. punctata*, *P. ticto*, *P. setnai* etc now belong to the genus ***Pethia***.

The species hitherto identified as *P. sarana*, *P. martenstyni*, *P. pleurotaenia* and *P. asoka* now belong to the genus ***Systemus***.

The species earlier identified as *Puntius fasciata* now belongs to the genus ***Haludaria***.

Further, the two species *Puntius denisonii* and *P. chalakkudiensis* now belong to the genus ***Sahyadria*** (Raghavan *et al.* 2013).

The species earlier identified as *Eetroplus maculatus* (family Cichlidae) now belongs to the genus ***Pseudetroplus*** (Pethiyagoda *et al.* 2014).

The species earlier identified as *Mystus vittatus* (family Bagridae) in Sri Lanka is now considered a distinct species, ***Mystus nanus*** (Sudasinghe *et al.* 2016)

The species earlier identified as *Ompok bimaculatus* (family Siluridae) from Sri Lanka, have been separated into two distinct species; ***O. argestes*** and ***O. ceylonensis*** (Sudasinghe and Meegaskumbura, 2016).

Acanthocobitis urophthalmus is now referred to ***Paracanthocobitis urophthalma***.

The loach genera *Schistura* and *Paracanthocobitis*, which earlier belonged to the family Balitoridae, now belong to the family ***Nemacheilidae***.

The family Belontiidae is now considered a synonym of the family ***Osphronemidae***, thus species such as *Belontia signata*, *Pseudosphromenus cupanus*, *Malpulutta kretseri* belong to the family Osphronemidae.

Abbreviations for the name of collectors

DG Dinesh Gabadage; KM Kelum Manamendra-arachi; MK Maurice Kottelat; MMB M Bahir; RP Rohan Pethiyagoda; SB Sudesh Batuwita; SVN Sudath Nanayakkara.

Acknowledgement: I'm grateful for Rahul Kumar (NBGFR) for his help in the identification of some of the Indian taxa.
